From our beginnings in 2011, our growth is testament to our success and we look forward to your continued support. The more members we have, the more we can do for the children and us as parents/carers. Our aim is for the children to have oodles of fun and for the parents/carers to gain support through meeting other families. We regularly invite professionals to speak at our meetings on a variety of topics and we also have an extensive library of specialist titles, all of which, are free to borrow.
